DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Taiwan on 07/11/01. It is noted, however, that applicant has not filed a certified copy of the application as required by 35 U.S.C. 119(b).

Oath/Declaration

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which priority is claimed, by specifying the application number, country, day, month and year of its filing.

Claim Objections

3. Claims 2 and 3 objected to because of the following informalities: step (6) and steps (3-1, 3-2) are not shown. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claim 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Nam (U.S. Patent 6,141,598).

Regarding claims 1-10, Nam discloses a method for a production plan (200 to 211 to 210) including transmitting a production plan through the network, storing the plan, reading the plan and material requirements (figures 3 and 4A/4B, column 8, lines 34⁺).

Regarding claims 12-16, Nam clearly discloses the claimed system for immediately issuing a production plan (Abstract and figure 3).

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Formenti and Hair et al. disclose related art.
